Jones Residence

**Push to Call**

# GK100-M

- Backlit Keypad and LCD

- 100 Entry Codes

- Mobile App & Web Programmable

The GateKeeper is a telephone entry system that uses standard cellular service eliminating the need for costly hard wiring.  As long as cellular service is available, It is very simple to install regardless of the terrain or location.  And with its advanced access control features, the GateKeeper is one of the most versatile entry systems on the market.

**Gate**
⇒ **Open**
⇒ **Close**

## Features:

- **Cellular communication** eliminates costly hard wiring. Works with standard SIM card services. (SIM card not included)
- **Built-in keypad** allows homeowners and visitors simple and advanced entry code control
- **Backlit keypad and LCD** for easy visitor use and onsite programming
- **Mobile app** allows a resident to open and close the gate using their cellular phone and simple programming
- **PC programmable** via the Access One web server for advanced programming and gate control
- **Bluetooth ID access control** automatically opens the gate when a programmed Bluetooth ID is within range of the unit
- **Caller ID access control** activates the gate when called by a recognized Caller ID to work as a touch free entry code
- **Alert notifications** can be sent by email or text messages when an invalid code is used or other set actions
- **Entry code messages** allow a specific message to be displayed on the LCD each time the entry code is used.
- **Call forwarding** can forward a call from the residence to a different number during set times of the day or week.
- **365 Day time clock** allows entry codes to be time controlled at set times and days, auto gate schedules, and call forward schedules
- **Programmable welcome message** can be customized for each residence.
- **Multi-Resident feature** allows the unit to be used as a small commercial unit for multiple residents with a LCD directory
- **Do not disturb** feature turns the call button off at set times so visitors will not disturb the residents
